

RESEARCH GRANTS

The Trustees of Newlife the Charity for Disabled Children are pleased to invite UK based research applications.

Applications should be relevant to the aetiology, prevention and treatment of Birth Defects. Newlife wishes to encourage a broad range of research within this area of Birth Defects. However, applications into areas such as fetal loss and later onset genetic disorders would only be funded in exceptional circumstances. Newlife currently fund two types of grant. These are:

Full Grants

Full grants are to fund 1-2 year research projects and should not exceed £120,000 in total. The awards will be subject to peer review by the Medical and Scientific Panel of the charity. **The closing date for Full Grants applications is 5pm Friday, 6th October 2017.**

Start Up Grants

Start Up grants should not exceed £15,000. These are specifically to allow researchers to undertake short projects either as complete projects or as a preliminary activity to develop full projects. These grants are not available to complete existing projects. **Applications for Start Up grants are welcome anytime throughout the year up to 5pm Friday, 16th February 2018.**

Application forms are available from:

- Our website at www.newlifecharity.co.uk/research
- Email at research@newlifecharity.co.uk
- Telephone 01543 468 888

All clinical/research relevant enquiries will be referred to Newlife Charity's Medical Director, Professor Michael Patton.
